

(a) Population Search (LoCoMo)

(b) Linear Search (LoCoMo)

(c) All Programs

LLM-Centric

Relies on the LLM to filter and rank raw text at read time

Semantic Search

Pure vector similarity search over multi-field knowledge items

Hybrid Retrieval

Combines SQL indexing with vector search and LLM re-ranking

Relational Index

Stores facts in multi-table SQL with indexed queries

Structured RAG

Organizes data in SQL tables and vector indices for structured retrieval
